Purple Progressive Registration Screen

March 4, 2024

Anonymous

create a beautiful screen set with progressive registration , collect first name last name and address in completion screen, use clean styling but interactive and nice in the a purple theme

Gigya Markup Expert

For a progressive registration screen-set that collects the user's first name, last name, and address upon completion, while also incorporating a clean yet interactive design in a purple theme, here is a custom Gigya screen-set markup. This screen-set is designed to first capture basic information and then, upon successful initial registration, prompt the user to complete their profile by providing their address details.

html   ⬚ Copy code

```html
<div class="gigya-screen-set" id="Custom-ProgressiveRegistration" data-respon
  <div id="gigya-register-screen" class="gigya-screen v2 portrait" data-width
    <form class="gigya-register-form" id="gigya-register-form" data-on-succes
      <!-- Basic registration form fields -->
      <div class="gigya-layout-row">
        <input type="text" name="firstName" class="gigya-input-text" placehol
      </div>
      <div class="gigya-layout-row">
        <input type="text" name="lastName" class="gigya-input-text" placehold
      </div>
      <div class="gigya-layout-row">
        <input type="email" name="email" class="gigya-input-text" placeholder
      </div>
      <div class="gigya-layout-row">
        <input type="password" name="password" class="gigya-input-password" p
      </div>
```
